Riders 1673.

Brittish Merlin

Bedeckt with many delightful varieties and useful verities, fitting the Longitude and Latitude of all Capacities within the Islands of Great Britains Monarchy, and Chronological Observations of principal note, to this Year 1673. being the first after Bissextile or Leap year.

WITH

Notes of Husbandry,

Physick, Fairs, and Marts Directions and Tables to all necessary uses.

Made and Compiled for the benefit of his Country.

BY

Cardanus Riders.

LONDON.

Printed by *S. G.* for the Company of Stationers, 1673.

ALL measures of longitude are deduced from barley corns. three barley corns make an inch, twelve inches one foot, three feet one yard five yards and an half one Statute-pole, or pearch: forty pearches make a furlong, eight furlongs make an english mile: ina mile are three hundred and twenty pearches or poles, one thousand fifty six paces: Ells, one thousand four hundred and eight: Yards, one thousand seven hundred and sixty: Feet, five thousand two hundred and eighty: Inches, sixty three thousand three hundred and sixty: and Barley corns, one hundred ninety thousand and eighty.

The Circumference of the Earth and Sea jointly is 25036 miles and the Diameter 7966 miles, and its semidiameter 3983 miles according to English mensuration.

The Dimensions of England and the adjacent Islands.

THe length of England from South to North is 386 miles, the broadest place from the Lands end to Sandwich is 279 miles, the next broadest place, which is between S. Davids and Yarmouth in the East, is 240 miles the whole compass of England is 1532 miles.

The length of Ireland North and South is 303 miles the greatest breadth thereof East and West is 112 miles, the whole compass of the main land is 948 miles.

The greatest length of Scotland South and North is 280 miles, and the breadth East and West is 165 miles: the whole compass 1100 miles.

The Ile of Man is in length 28 miles, the breadth 18 miles, and in compass 91 miles.

The Ile of Anglesey is in length 21 miles, in breadth 18 miles, in compass 85 miles.

The Ile of Wight is in length 22 miles, in breadth 11 miles, in compass 57 miles.

The Ile of Garnsey is in length 14 miles, in breadth 6 miles, the whole circumference is 36 miles.

The Ile of Jersey, in length 10 miles, in breadth 9 miles in compass 28 miles.

30-807

World; containing Europe, Aſia, Africa, and America.

EUrope contains in it theſe Provinces, Germany, Swedland, Denmark, Italy, Muſcovia, Hungaria, France, Spain Polonia, Sclavonia Norway, Grecia. The moſt eminent Iſlands are theſe, Great Britain, Ireland, Sardinia, Candia, Nigropont, and Corſica.

The greateſt length of this part of the World is 3000 miles, the breadth 900,

Aſia, the biggeſt of the four, and firſt known part of the world contains theſe principal Regions & Iſlands, *viz.* Armenia Anatolia, Perſia, Aſſyria, China, Syria, Arabia, Meſopotamia, India Parthia, Media, Paleſtine, Caldea, Tartaria.

In Africa are theſe Provinces *viz.* Egypt, Barbary, Æthiopia, Nubia, Abaſſines, Alonomotopa, Lybia. The Iſlands Magdagarde S Thomas, Inſula de Cape Verde, Inſula de Canaria, Inſula de Madera.

America the fourth part of the world, and of the lateſt diſcovery, conſiſteth of theſe two parts, Mexicana and Peruana.

The Provinces of Mexicana are Nova Hiſpania, Terra, Florida, Nova Albonia, Caluſornia, Noimbega, Nova Francia, Eſtoriland The chief Iſlands of Mexicana are Greenland, Heland, and Frieſland.

The Provinces of Peruana are Braſil, Piſni de Chibana, Peru de Cartanen, Chila, Charon, Chico, Patagores. The chief Iſlands of Peruana are Hiſpaniola, Cuba, Jamaica, and many other

The Exchequer opens 8 daies before any Term begins, except *Trinity* Term, before which it opens only four daies.

Note, that the firſt and laſt daies of every Term, are the firſt & laſt daies of appearance

The Subsequent Diary explained.

THe Year consisting vulgarly of 12 months is contained in 12 pages, each moneth is divided into 9 columns. In the first of which is placed the daies of the months.

In the second the daies of the week, ☾ being this years Dominical Letter.

The third contains the Feasts fixed & moveable, in a plenary way, the beginning and end of the Terms, & the Suns ingress into the Signs.

The fourth shews the sign, wherein the Moon is every day at noon.

The fifth shews the hour and minute of high water at London-bridge every day.

The sixth hath a Diary judgment of the weath.

The seventh on the blank-sides Sun-rising.

The eighth is Sunsetting every day in the year

The ninth is notes of Husbandry and Physick.

This is the Season for good Husbands to lop and prune superfluous Branches from Fruit-trees; Uncover their Roots, set all kind of Quickſets and Fruit-trees in the New of the Moon. Be ſure the Wind be not North, nor East; and ſet the ſame ſides to the South & West, which grew at the firſt. Set Beans, Peaſe, and Parſnips: The Weather mild, and Moon decreaſing, dig Gardens; drench weak and ſick Cattle, Kine, with Verjuice, Horſes with Water and Ground Malt, ſodden with a little Bran.

In this Moneth let not Blood, nor uſe Phyſick, unleſs neceſſity conſtrain thee; beware of taking cold, for Rhumes and Flegm do much increaſe this Moneth: Its hurtful to faſt long, to drink White Wine faſting is good; Uſe Meats that are moderately hot, for the beſt Phyſick is warm diet, warm Cloaths, good Fires, and a merry honeſt Wife.

February hath xxviii days.

This Moneth ſet, cut, and lay Quickſets and Roſes, as all other Plants. Set and Plant Vines, Hops, and all fruit that grows on Buſhes. Sow Peaſe, Beans, and Onions; furniſh your Gardens with Sallads and Pot-herbs for Summer. Prune and trim all ſorts of Fruit-trees from Moſs, Canker, and ſuperfluous Branches. Remove Grafts of young Trees, in the laſt quarter, the Moon being in *Aries*, *Libra*, or *Scorpio*.

If neceſſity urge, you may let Blood, but be ſparing in Phyſick, and be ſure when a warm day comes, to prevent taking of cold through careleſneſs; for the warm Air this Moneth is not laſting, but oft deceives us to our prejudice.

In this Moneth, Slimy Fiſh, Milk, and the like, that do opilate, and ſtop the Liver, and the Veins, and thicken the Blood, are to be eſchued as Enemies to Health.

March hath xxxi days.

Now regarding the Wind and Weather, Graft, cut Quickſets, cover the Roots of Fruit-trees (open'd in *December* and *January*) with fat Earth; ſow Oats, Barley, Parſnips, Onions, Carrots, Melons, Cowcumbers, and all kind of Pot-Herbs, Slip Hartichoaks and Sage, and ſow all manner of Garden Seeds.

Now adviſe with the honeſt and able Aſtrological Phyſitian; it is good to purge and let Blood, for in this Moneth the Humors and Blood increaſe, and groſs Feeding breedeth groſs Blood and Humors; therefore uſe means of good digeſtion, and ſuch as afford good Juice and Nutriment to the Body; forbear all things Salt, purge the Blood by Potions, and Blood-letting; ſweet Meats and Drinks are commendable.

This Moneth ſow Hemp, and Flax, Pole Hops, ſet and ſow all kindes of Garden Herbs. Reſtore the liberty of the laborious Bee, by opening her Hive. Bark Trees for Tanners; and let good Huſwives minde their Gardens, and begin to think of their Daries.

In Gardning never this rule forget,
To ſow dry, and ſet wet.

The uſe of Phyſick becomes now ſeaſonable, as alſo Purging and Blood letting. It is good to abſtain from Wine; for many Diſeaſes will be taken thereby, to the ruine of many.

This Moneth the Pores of the Body are open, and apt to receive Phyſick; therefore this is the beſt time to remove, and prevent cauſes of ſickneſs, or for ſpeedy remedy in extremities.

May hath xxxi days.

This Moneth commands the provident Houſwife, and the prudent Artiſt, to ſet their Stills on work. In the beginning of the Moneth ſow and ſet thoſe tender Summer Herbs that would not endure the former co'd. Weed your Hop Gardens, cut off ſuperfluous Branches Moſs Trees and Gardens, and weed Corn; riſe early, and walk the Fields and Gardens.

Now every Garden and Hedge affords thee Food and Phyſick Riſe early, walk the Fields by running ſtreams, the North and Weſt ſides, Sage and Sweet-Butter, an excellent breakfaſt. Clarified Whay with Sage. Scurvy Graſs, Ale, and Worm-wood Beer, are wholſom Drinks. Green Whay excellent againſt Choler. Eat and drink betimes in the morning. Abſtain from Meats that are hot in Nature, and Salt in Quality.

At the Full of the Moon, this Moneth and next, gather your Herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish, three or four days after the Full, and they will not run to Seed. Shear your Sheep the Moon increasing Take heed of cutting Herbs or Flowers with Knife, but rather gather them with your Fingers.

Let honest moderate Labor and Exercise procure your Sweat. Thin and light Diet, and chaste Thoughts, tend to health Lie not unadvisedly on the Ground, or overhastily drink.

Distilling of Roses, and making of Surrups and Conserves are now in prime: Use a light and thin Diet, for the Stomach is weaker now then in the former Moneths; Clarified Whay boiled with cold Herbs, very wholsome.

July hath xxxi days.

Get Rue, Wormwood, and Gall, to ſtrew on your Floors, to deſtroy Fleas At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the ſhade than in the Sun, which too much exhaleth their vertue; but to avoid corruption, let the Suns heat a little viſit them,

Beware of violent heat, and ſudden cold, which are the great diſtempers of this Month, and produce peſtilential diſeaſes: Forbear ſuperfluous drinking, but eat heartily: Uſe cold Herbs and Meats, abſtain from Phyſick. Now the Rivers are more wholſom then the Baths. In time of Peſtilence keep your Chamber Windows ſhut till the Sun have force of ſhining: Perfume your Chamber every morning with Tar upon a Chafing-diſh of Coals: Uſe *Carduus Benedictus* boiled and drank faſting.

The beginning of this Moneth, and the end of the former, gather Hops, their Complexion being brown, and the weather fair, and no dew on the ground. Kill Bees, make Verjuice, remove and set all slips of Flowers, between the two Lady days; remove Trees from *September* till *February*, especially in the new of the Moon. The weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit, Sow Wheat and Rie, Winter Parsnips and Carrots; and set Roses, Strawberries, and Barberries.

Now as the year declines, provide your Winter Garments, hang them on loosly, to prevent that you might after repent of: Good for Physick and Phlebotomy.

Saw Wheat and Rie, remove young Plants and Trees about the New Moon, observing this as a seasonable Secret, that in setting, you carefully place that side to the South and West, which were so before you took up the Plant; otherwise the cold kills it Gather your remaining Winter Fruit, set all kindes of Nuts and Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The Garments you last Moneth hung on your backs in jest, now Button them close in good earnest: Cloath you now for prevention, for the Cold comes insensibly, and Fogs oftimes beget a whole Winters cold. Consult with your Tailors, as well as Physicians.

November hath xxx days.

Set Crabtree Stocks to graft on. In the old of the Moon, ſet Peaſe and Beans, and ſow Parſnips and Carrots. Trench Gardens with Dung, uncover the Roots of your Apple-trees, and ſo let them remain till *March*. Kill Swine in or near the Full of the Moon, and the fleſh will the better prove in boiling.

The beſt Phyſick this Moneth, is good exerciſe, warmth, and wholſom Meat and Drink: But if any diſtemper afflict the body, finiſh your Phyſick this Moneth, and ſo reſt till *March*, unleſs neceſſity urge. Uſe good Meat and wholſom Drinks to nouriſh the Blood. Be ſure to go dry of your Feet; for if you go wet of your Feet (unleſs it be thoſe always uſed to it) be certain to be troubled with Rhume and Cold, and other inconveniencies attending.

December hath xxxi days.

In the last Quarter of the Moon, this Moneth and the next, are the best times to fell Timber: Let Fowlers minde their Game. Cover all your best Flowers and Herbs from cold and storms, with rotten Horse-dung. Look well to thy Cattle, Blood Horses. Let a warm fire, and a cup of *Nectar* be thy Bath; the Kitchin thy Apothecaries Shop, Hot Meats and Broths thy Physick, and a well spred Table the proof of thy Charity to thy poor Neighbors to whom this advice is seasonable;

If thou be poor, and canst not feast at all,
Thank God for such as thee to feasting call.

The best Physick is as before, a merry honest Heart, and the exercise of Charity among thy poor Neighbors.

Of Eclipſes this preſent Year. 1673

THere will be onely two Eclipſes this preſent year, and both of the Sun, none of the Moon.

The firſt is on the Sixth of *February*, near ſeven of the clock at night, but not to be ſeen in our *Horizon*, the Eclipſe falling above two hours after Sunſet.

The ſecond of the Sun, is on the ſecond of *Auguſt*, near a quarter after nine in the Morning, but with us ſo ſmall, hardly diſcernable; and ſo of none, or little ſignification to us. Therefore I ſhall forbear any further diſcourſe hereof.

The Deſcription of the four Quarters of the Year.

THe *Spring* begins this year the ninth of *March* 12 minutes after 10 at night, the Sun then entring the firſt ſcruple of *Aries*, equaliſing day and night.

The *Summer* Quarter begins eleventh of *June*, a quarter after one in the morning, making to us the longeſt day, and ſhorteſt night in the year.

The *Autumn* Quarter begins, the Sun cutting the *Æquator* in *Libra*, *Sept.* 12 three quarters after four in the afternoon, making day and night again equal

The *Winter* Quarter takes beginning the eleventh of *December*, at 20 minutes after 4 in the morning, the Sun then entring the *Southern Solſtice Capricorne*, making with us the ſhorteſt day, and longeſt night in the year.

A true and plain description of the High-ways in *England* and *Wales*.

From London to Cambridge 44 miles, thus accounted;
